

## INVITATION

### **Energy Sector business potentials in Indonesia - Seminar with minister for Policy Coordination and Energy Mr. Ibrahim Baylan**

*Swedish Energy Agency invites you to a seminar with Minister for Policy Coordination and Energy Mr. Ibrahim Baylan.*

**Date and time:**

15 December 2016  
10:00-12:00am.

**Venue:**

World Trade Center Stockholm  
Klarabergsviadukten 70  
2nd floor

Indonesia is at the heart of the world's most dynamic economic region and by far the largest economy in Southeast Asia. With a population of 255 million and massive investments in infrastructure, a rapidly growing consumer market, and a progressive economic reform agenda, Indonesia is set to strengthen its position in the region and as a force in the world economy.

The demand for sustainable and innovative energy solutions in Indonesia is growing at an increasing rate. By 2019, Indonesia has set a target to increase total electricity capacity with 35GW. By 2025, the government is targeting 23% of the total energy mix to be made up by renewable resources.

Swedish companies can offer a lot to the Indonesian energy sector - both energy efficiency solutions and solutions for improving the energy mix to focus on more renewable energy sources.

Team Sweden is working in Indonesia supporting Swedish technology and know-how. To further increase this focus and support Swedish exports, The Swedish Minister for Policy Coordination and Energy Mr. Ibrahim Baylan is planning to lead a Swedish business delegation to Indonesia in February 2017.

### **Learn more about the Indonesian market and the upcoming energy delegation**

The Indonesian Embassy in Stockholm, the Swedish Energy Agency, Business Sweden, and the Ministry of Environment and Energy welcome you to this seminar on the opportunities in the Indonesian market for companies working on renewable energy and energy efficiency related products and services. The seminar is open to those working with energy solutions and having an interest in establishing themselves or developing their business in the Indonesian market.

# INVITATION

During the meeting we will give an overview on the Indonesian market with focus on the business potentials within the energy sector, present the Team Sweden “Business Accelerator Program” and the results of an Indonesian market analysis on sustainable heating and cooling, smart grids and energy efficiency. A brief introduction to a new Waste to Energy program will also be presented. We will also introduce the coming business delegation to Indonesia planned in February 2017.
