This application concerns EECS guarantees of origin for gas

Holder

Name/company		Corporate/personal ID number	Holding (%)
c/o Address			
Address			
Postal code	City		
Country			
Phone number	E-mail		

Contact person (the person the Swedish Energy Agency should contact regarding this application)

Name	
Phone number	E-mail

Production device information

Production device name	Estimated normal annual production (MWh)
Property designation	
Postal code	City
Property designation is not applicable, coordinates given instead ☐ SWREF-99-TM ☐ SWEREF-99 ☐ WGS-84	
Latitud (N)	Longitud (E)

**Production unit information**

Type of gas	Purity level (for hydrogen)
Technology code	
Commissioning date	Production capacity
Fuel codes	
Is the production device connected to a grid? ☐ Yes ☐ No	
Grid (name)	

Grid owner/metering company

Company		Corporate ID-number
Contact person with the reporting company (if applicable)		
Phone number	E-mail	

Information concerning support

Has the production device received any kind of investment support from a national support system? ☐ Yes ☐ No
If yes, state what kind of investment support
Has the production device received any kind of production support? ☐ Yes ☐ No
If yes, state what kind of production support

Appended mandatory documents

☐ Flow chart for the production device with the following information a) information on flows of other types of energy, b) point of connection to gas grid or where the gas is made available for trading c) auxiliary energy, d) import- and exportmeter for gas, e) energy storage and f) on-site consumption of gas within the production facility.
☐ Report from an independent third party, <i>alternatively</i> ☐ environmental permit from the County Administrative Board, Länsstyrelsen, pursuant to Chapter 21, Sections 2, 4 or 5 of the Environmental Assessment Ordinance, miljöprövningsförordningen (2013:251), or ☐ notification to the municipality pursuant to Chapter 21, Sections 3 or 6 of the Environmental Assessment Ordinance, miljöprövningsförordningen (2013:251)

Appended non-mandatory documents

- ☐ Authorisation
☐ Other

Other information

Special account for EECS guarantees of origin

- ☐ I wish to apply for a special certificate account for EECS guarantees of origin. I have read and accepted the terms and conditions
☐ I already have a special certificate account for EECS guarantees of origin

Signatures of all holders

Date

Signature of holder (or authorised representative of the holder)

Name in block letters

Instructions for the form Application for the issuing of EECS guarantees of origin

This form is used for companies and private individuals who want to apply for EECS guarantees of origin for gas.

For the production device to be able to be approved for EECS guarantees of origin, the holder must also hold a special account for EECS guarantees of origin in the Cesar registry. An application for a special account for EECS guarantees of origin is compulsory for all actors who want to hold EECS guarantees of origin in their certificate account.

All information in the form is compulsory. The application must be signed by authorised company signatories or authorised representatives and sent to the Swedish Energy Agency. If the application pertains to a legal entity not covered by the Swedish business register, attach a registration certificate, record or equivalent document where it states who is an authorised representative.

Fees for account operations have been set in the Ordinance on Guarantees of Origin for Energy (2025:1258).

Holder

Information provided on holder(s) also pertains to other types of legal entities, such as economic associations, etc. If the production device is held by several parties, information must be provided for all holders.

Name/company

The party applying for the right to issue guarantees of origin must enter their name or company. The holder is the party that holds the production device through ownership or right of use.

Corp./personal ID number

The applicant's corporate or personal identity number.

Holding

The holder's percentage holding in the production device to which the application pertains. This percentage forms the basis of the allocation of the guarantees of origin that are allocated.

Contact person for application

The contact person for this application with information on e-mail address and phone number. Contact information must be provided.

Production device information

The following information is used to identify the production device in the Swedish Energy Agency's register as it shall already be registered for guarantees of origin.

Production device name

The name is used to identify the production device in the Swedish Energy Agency's registers.

Estimated normal annual production

Calculated yearly production, measured in MWh.

**Property designation**

The property designation for the property where the production device is located. If the property is very large (> 1 square kilometer). Coordinates may be used when there is no property designation, for instance if the production device's metering point is at sea.

Production unit information**Type of gas**

State the type of gas produced. If the production device produces a mix of gases, enter "gas mixture"

Technology code

State the production technology used to produce the gas in the production device. If several technologies are in use, enter "unspecified".

Commissioning date

The date in which the device that produces the final output became operational. Date when the upgrading plant went operational.

Production capacity

Production capacity (in kW) is calculated by multiplying the Estimated Normal Annual Production (in MWh) by 1000 and dividing the result by 8760, the number of hours in a year.

Fuel codes

Fuel codes cannot be altered or added. Be sure to add any fuel code that is currently in use and that may be in use in the future.

Available fuel codes are found in Fact Sheet 5 at www.aib-net.org → EECS → Fact Sheets → FS05: Types of Energy Inputs and Techno

Grid

Name the grid the production device is connected to.

Grid owner/metering company

Name and contact information for the company responsible for reporting the metering data of the production

Information concerning support

State if the production device has received investment support or production support, and the name of the support.

Appended documents

Mark attached appendices. Make sure to submit all mandatory documents with your application.

Special account for EECS guarantees of origin

State whether you already have, or are also applying for, an account for EECS Guarantees of Origins.

Other information

Information that may be of significance for this application.

Signatures of all holders

Signature of holder (or authorised representative of the holder) The signatures of all holders must be provided here. Signers must be authorised signatories or representatives of holders that are companies. Private individuals can sign themselves or use representatives. If the application is signed by a representative, the authorisation (power of attorney) must also be sent.

**Information on the Swedish Energy Agency's processing of personal data**

The Swedish Energy Agency is the personal data controller for the processing of personal data done in the Agency's activities.

Rules for how personal data may be processed are in Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46/EC (General Data Protection Regulation) and the Act (2018:218) with Supplemental Provisions to the EU General Data Protection Regulation.

Personal data is all kinds of information that can directly or indirectly be linked to a now-living natural person.

For the Swedish Energy Agency to be permitted to process personal data, it is required that there is a legal basis and a purpose for the processing. The legal basis for the processing at hand is the exercise of public authority. The purpose of the processing of the personal data you provide is to be able to handle matters pursuant to the Act on Guarantees of Origin for Electricity (2010:601).

You have a right to request information on and gain access to the personal data concerning you. You can also request to have incorrect information about you corrected, information deleted or that the processing be limited. In some cases, you may also have the right to object to the Swedish Energy Agency's processing of personal data. If you believe that the Swedish Energy Agency's processing of your personal data conflicts with the General Data Protection Regulation, you can file a complaint with the Swedish Data Protection Authority.

If you have any questions regarding the processing of your personal data, you can contact the Swedish Energy Agency's data protection officer.

Terms and conditions for account for EECS Guarantees of Origin

EECS Guarantees of Origin (GOs) comply with the European Energy Certificate System (EECS). Handling of these GOs shall therefore be in accordance with the regulations agreed in the Association of Issuing Bodies (AIB). Granting of an account in the registry database is therefore conditional on the following terms.

- Usage of the Account and the Production Devices for which GOs are issued to the Account must follow the regulations of the latest adopted version of the Domain Protocol for Domain Sweden.
- If Guarantees of origin are issued to the Account Holder in error, or with inaccurate information, the Account Holder must inform the Swedish Energy Agency as soon as possible. The Account Holder shall in this situation cooperate with the Swedish Energy Agency and make all reasonable endeavors to ensure that no unjust enrichment occurs.

Information

There is an annual fee for holding an account for EECS GOs.

Producers pay an annual fee for each commenced calendar year in which a facility is approved for EECS Guarantees of Origin.

If the Swedish Energy Agency is unable to fulfill the standard for a period because the terms of the EECS or a requirement of the AIB contradicts legal requirements in Sweden, GOs issued during this period will not be EECS-GOs that can be transferred to another Member State. The Swedish Energy Agency will inform all Account Holders of any such contradictions as soon as they are known.

The AIB itself and members of the AIB may have limited liability vis-à-vis Account Holders. The Swedish Energy Agency is liable vis-à-vis Account Holders as prescribed by law and is not limited in its liability. Account Holders in the Swedish Registry Cesar shall primarily direct any claims for damages that arise from errors in Cesar or other similar damages regarding the trading of GOs to the Swedish Energy Agency.

The Swedish Energy Agency is responsible for keeping a current version of the Domain Protocol available on the agency's website, and for informing Account Holders of any relevant changes to the Domain Protocol.
