## Application for right to allocation of guarantees of origin for electricity

### 1 Applicant

Name/company		Personal/corporate ID number	Holding %
Address			
Postal code	City		Land
Phone number	E-mail		

#### 1a Contact person (the person the Swedish Energy Agency should contact for questions regarding this application)

Name		
Phone number	Mobile phone number	E-mail

### 2 Basic information

Energy source			
<input type="checkbox"/> Water	<input type="checkbox"/> Wind	<input type="checkbox"/> Biofuel/peat/fossil	<input type="checkbox"/> Sun
<input type="checkbox"/> Geothermal	<input type="checkbox"/> Wave	<input type="checkbox"/> Other ocean energy	<input type="checkbox"/> Nuclear power
<input type="checkbox"/> Other: .....			
Production device name			Est. normal annual production (MWh)
Property designation			
Postal code		City	

#### 2a Information on metering (obtained from grid owner/reporting company)

Grid area ID	Production device ID	Ediel-ID	Is the production device's electricity production metered per hour? <input type="checkbox"/> Yes <input type="checkbox"/> No	Is the production reported in the connection point to a grid subject to concession? <input type="checkbox"/> Yes <input type="checkbox"/> No
--------------	----------------------	----------	---	---

### 3 Investment support

Has the production device received any form of investment support from a national support system? If you are awaiting a decision on or payment of investment support, you should answer NO. <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Don't know	
Amount	Date(s)

**4 Grid owner/reporting company**

Company		Corp. ID no.
Address		
Postal code	City	Land
Phone number	E-mail	

**4a Contact person**

Name		
Phone number	Mobile phone number	E-mail

**5 Appended forms/documents**

The following are appended to the application		
<input type="checkbox"/> PE UG	<input type="checkbox"/> Authorisation	<input type="checkbox"/> Other: .....

**6 Other information**

--

**7 Signatures of all holders**

City, date
Signature of holder (or signature of authorised representative of holder)
Name in block letters

## Instructions for form GO

### Application for right to allocation of guarantees of origin for electricity

#### Information on the Swedish Energy Agency's processing of personal data

The Swedish Energy Agency is the personal data controller for the processing of personal data done in the Agency's activities.

Rules for how personal data may be processed are in Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46/EC (General Data Protection Regulation) and the Act (2018:218) with Supplemental Provisions to the EU General Data Protection Regulation.

Personal data is all kinds of information that can directly or indirectly be linked to a now-living natural person.

For the Swedish Energy Agency to be permitted to process personal data, it is required that there is a legal basis and a purpose for the processing. The legal basis for the processing at hand is the exercise of public authority. The purpose of the processing of the personal data you provide is to be able to handle matters pursuant to the Act on Guarantees of Origin for Electricity (2010:601).

You have a right to request information on and gain access to the personal data concerning you. You can also request to have incorrect information about you corrected, information deleted or that the processing be limited. In some cases, you may also have the right to object to the Swedish Energy Agency's processing of personal data. If you believe that the Swedish Energy Agency's processing of your personal data conflicts with the General Data Protection Regulation, you can file a complaint with the Swedish Data Protection Authority.

If you have any questions regarding the processing of your personal data, you can contact the Swedish Energy Agency's data protection officer.

#### General

This form is used to apply for the right to allocation of guarantees of origin. The application shall be made by the party or parties that hold a production device that produces electricity. Information on the production device's production units is provided on Appendix PU GO.

### 1 Applicant

That provided here regarding company information also pertains to other types of legal entities, such as economic associations, etc. If the production device is held by several parties, information must be provided for all holders.

Name/company	The party applying for the right to allocation of guarantees of origin must enter their name or company. The holder is the party that holds the production device through ownership or right of use.
Personal/corporate ID number	The applicant's personal or corporate identity number.
Holding	The holder's percentage holding in the production device to which the application pertains. This percentage forms the basis of the allocation of the guarantees of origin that are allocated.
Country	Information regarding country should only be provided if the holder has an address outside Sweden.

#### 1a Contact person

A contact person must be indicated. The contact person is the person the Swedish Energy Agency contacts for questions regarding this application. If the application is filed through a representative, provide the representative as the contact person.

### 2 Basic information

Energy source	The energy source used in the production of electricity. If the energy source is not listed among the preprinted alternatives, mark the "Other" box and enter the energy source on the line.
Production device name	The name is used to identify the production device in the Swedish Energy Agency's registers.
Property designation	The property designation for the property where the production device is located. If the property is very large (> 1 square kilometre), X and Y coordinates for the production device's metering point are provided in addition to the property designation. If the production device's metering point is at sea, X and Y coordinates for the metering point are given. The coordinates are stated with a precision of five digits. The coordinates are stated in the National grid (RT90).
Postal code and City	Postal code and city for the location of the production device.

#### 2a Information on metering (obtained from grid owner/reporting company)

Grid area ID	The grid area ID consists of three letters. If the production device's production is to be reported from a metering point in the connection point to a grid subject to concession, the grid area the production device belongs to must be entered. Information on grid areas is provided on the Svenska Kraftnät website, <a href="http://www.svk.se">www.svk.se</a> . If the production device's production is to be reported from a metering point in a non-concession grid (directly after the generator), the code "IKN" is used.
--------------	---

Production device ID	The production device ID consists of a unique code with 18 characters. Used for metering series supplied to Svenska Kraftnät. Information on production device ID is provided by the grid owner for grids subject to concession. For a production device in a non-concession grid, a national unique production device ID (EAN) provided by the grid owner is recommended. If an EAN is not used, information on the production device ID is provided by Svenska Kraftnät.
Ediel-ID	The ID number that the reporter has been assigned for communication with Svenska Kraftnät regarding meter readings.
Is the production device electricity production metered per hour?	If the production device is in a grid subject to concession, the grid owner knows if the production device's electricity production is metered per hour. For non-concession grids, the holder is responsible for the electricity production being metered per hour.
Is the production reported in the connection point to a grid subject to concession?	Mark "Yes" if the production device's production is reported from a metering point in the connection point to a grid subject to concession. Mark "No" if it concerns a production device where the production is reported from a metering point in a non-concession grid.

### 3 Investment support

If the production device received investment support, the date(s) for when the support was disbursed and the size of the support (total in SEK) are entered. If it is not known if the production device received investment support, this is marked by "Don't know". The guarantee of origin will contain information on the production device's support. If it is not known if the production device received support, information on this will be on the guarantee of origin. If the produced energy unit received production support (electricity certificates), it will be presented on the guarantee of origin.

### 4 Grid owner/reporting company

The company that will report the production device's meter readings to Svenska Kraftnät. Information regarding country should be provided if the reporting company has an address outside Sweden.

#### 4a Contact person

The contact person at the grid owner or the reporting company concerning meter readings.

### 5 Appended forms/documents

Mark attached appendices.

### 6 Other information

Information that may be of significance for this application.

### 7 Signatures of all holders

Signatures of holders (or signatures of authorised representatives)	The signature(s) of the parties that have a right to represent the production device's holder(s) must be entered here. This must be an authorised signatory or a representative. If the application is signed by a representative, an original of the authorisation (power of attorney) must also be sent.
